AMRI 2026

- **Schedule**

Welcome	**09:30 - 10:00**	
9:30	Morning coffee	
9:50	Opening remarks	
Session 1	**10:00 - 11:10**	
10:00	**Robert Blasiak: *Marine Bioprospecting: History, Progress, and Prospects***	Invited presentation
10:40	Talk 1: Rachel Rosenberg Goldstein: *Pathogen exposure risks from sewage overflows in aquatic ecosystems: A case study from the largest sewage spill in U.S. history*	
10:55	Talk 2: Sofia Papadopoulou: *Environmental filtering selects for habitat generalists during the establishment of stream bacteria in downstream lakes*	
11:10	Coffee Break	
Session 2	**11:40 - 12:25**	
11:40	Talk 3: Mike Jetten: *Microbial Nitrogen Cycling and Metabolic Resilience in Metal Oxide-Rich Coastal Subsurface Sediments of the Bothnian Sea*	
11:55	Talk 4: Rickard Stenow: *Diatom, ciliate, and bacteria interactions in a N limited system*	
12:10	Talk 5:Judith van der Giessen: *Aerobic methane production driven by microbial methylphosphonate utilization in the Mediterranean Sea*	
Lunch	**12:25 - 13:30**	
12:25	Lunch provided outside Vivi Täckholmsalen	
Session 3	**13:30 - 14:40**	
13:30	**Maliheh Mehrshad: *Virus-host eco-evoloutionary dynamics in aquatic ecosystems***	Invited presentation
14:10	Talk 6: Alicia García Roldán: *Viral diversity and interaction with DPANN superphylum hosts along the salinity gradient of solar salterns*	
14:25	Talk 7: Anushree Sanyal: *From Sediments to Sequencers: The Chaetoceros muelleri Genome and Strain Comparisons*	
14:40	Coffee Break	
15:00	**AMRI discussion**	
Session 4	**15:30 - 16:30**	
15:30	Talk 8: Meriel J. Bittner: *Exploring the rare biosphere of aquatic microbiomes with microfluidic droplet cultivation + BioGeoSCAPES introduction*	
15:50	Talk 9: Malin Olofsson: *Monitoring the Expanding Frontiers of Cyanobacterial Blooms: Comparing ELISA, LC-MS/MS, and qPCR for Toxin Analysis in Temperate Waters*	
16:05	Talk 10: Joeselle Serrana: *Exploring the Relationship between Microbial Biodiversity and Pollutant Biodegradation in Rivers*	
16:10	Talk 11: Anabel von Jackowski: *From Active Methane Seeps to Legacy States: Benthic Microbial Community Shifts Across the Siberian Arctic Shelves*	
16:15	Closing remarks	

- **Where it is taking place**
  - Getting to Campus Frescati https://www.su.se/english/about-the-university/about-our-campus/finding-your-way-on-stockholm-university-campus#h-Frescaticampus
  - Getting to Vivi Täckholmsalen: Vivi Täckholmsalen Q211 (entrance level). Access at Svante Arrhenius väg 20A or 20D. The map below indicate the room position (2) on campus
